## DETAILED ACTION

1. In response to the Communications dated February 19, 2002, claims 1-56 are active in this application.

### ***Election of Species***

2. A telephone call was made to Thomas D'Amico on March 28, 2003 to request an oral election to the below restriction requirement, but did not result in an election being made.

3. This application contains claims directed to the following patentably distinct species of the claimed invention: 1) Sensing [claims 1-13 and 31-56; classified in class 365, subclass 196]; and 2) read/write circuitry [claims 14-30; classified in class 365, subclass 189.01]. These species reflect figures 7 and 8 of the present application.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument

that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the **cancellation** of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

#### ***Conclusion***

4. When responding to the Office action, Applicants are advised to provide the

Art Unit: 2818

Examiner with line and page numbers of the application and/or references cited to assist the Examiner in the prosecution of this case.

5. A shortened statutory period for response to this Office action is set to expire 30 days from the date of this communication. Failure to response within the period for response will cause the application to become abandoned (see **MPEP § 710.02(b)**).
